COMPANY PROFILE

CENSUS
IT Security Works

CENSUS is an independent, privately funded company dedicated to providing highly specialized and professional IT security services.

Our Mission

Safeguarding the digital now, especially in critical domains. Providing expert cybersecurity consulting incited from both outstanding research and deep experience.

Our Vision

To be universally acknowledged as a unique information security services provider in an emerging digital world.

SERVICES

The services provided by CENSUS have an immense differentiator. CENSUS invests heavily in IT Security Research, as it recognizes that information security threats are constantly evolving.

Through research that advances the state-of-the-art and experience, CENSUS gains unique insights into new attack vectors and techniques. This security intelligence information shapes the provided services, essentially protecting clients from future threats to their infrastructure and products.

CENSUS offers the following IT security services:

- Product Security Assessments
- Organization Security Testing
- Advisory Services
- Vulnerability Research

These services have been designed with the following goals in mind:

- to identify new security risks in technologies and organization processes
- to guide businesses on their journey towards security maturity
- to enable vendors to offer cyber-resilient products and services
- to protect business continuity
- to educate on current threats and countermeasures
- to ensure ROI on IT investments

ACHIEVEMENTS

CENSUS has helped shape the Secure Systems Development Lifecycle of major corporations around the world. It has audited the design and implementation of multiple security-critical devices. Many of its findings have made it into public advisories, covering both system-level components (e.g. Microchip SDKs, Linux kernel, Android multimedia framework, Microsoft Windows networking stack) and popular applications (e.g. WhatsApp Messenger, Oracle WebCenter). Furthermore, each year CENSUS experts present novel research at industry-leading conferences, such as Black Hat, DEF CON, INFILTRATE, OffensiveCon, TROOPERS, OWASP AppSec and Hack-In-The-Box.
